Technical product manager with a focus on identity management, backend platform stability & scalability, and big data operations.

WORK EXPERIENCE

Technical Product Manager, Toast Inc

April 2018 - present, Boston, MA

- Defined architecture and product requirements for the future of Toast federated identity management and user permissioning schemes
- Worked closely with engineering leads to develop OKRs and roadmaps for Platform Scale, Android Platform, and Performance teams
- Assisted investigation into performance engineering issues, including on site customer visits
- Served as Product representative on internal risk assessment advisory committee

Product Manager, PatientsLikeMe

January 2016 - April 2018, Cambridge, MA

- Product owner for multiple teams, including Data Ops, Site Ops, Client, Acquisition/Growth, Front End, and Platform, managing a wide range of internal and external stakeholders
- Worked with engineers on technical teams to build product roadmaps, project plans, and goals for large multi-month projects
- Utilized metric software to deeply understand user behavior, judge success/failures of new product rollouts, and monitor performance goals

Software Engineer, edX

July 2012 - December 2015, Cambridge, MA

- Product owner for Open Source team, aligning open source contributions to our roadmap and working with teams located worldwide
- Product owner and tech lead for internationalization and localization
- Scrum master for Open Source team
- Platform engineer helping with database key rearchitecture, bulk emailer backed by SES, and various learning tools
